## Welcome, Future Aviation Professional!

I put this guide together for you because I know firsthand how transformative a scholarship can be. My entire aviation career started with a scholarship. Without that initial financial support, I honestly don't know if I would be where I am today. That scholarship didn't just pay for training—it told me that someone out there believed in my dream, and that gave me the confidence to go after it with everything I had.

I owe my whole career to the people and organizations that invested in me when I was just getting started. Now, I want to pay it forward to you.

Aviation is one of the most rewarding industries on Earth. The feeling of lifting off a runway, the satisfaction of keeping aircraft safe and airworthy, the pride of managing operations that move millions of people—there is nothing like it. And right now, this industry needs YOU. There is an unprecedented demand for pilots, mechanics, controllers, dispatchers, engineers, and managers. The doors are wide open.

I know the cost of aviation training can feel overwhelming. Flight school, A&P programs, university degrees—none of it is cheap. But please don't let the price tag stop you. There are hundreds of scholarships and sponsorships out there, and many of them go unclaimed every year simply because people don't know they exist or don't bother to apply.

That's why I created this guide. I've done the research so you don't have to. Inside, you'll find scholarships for every path in aviation—whether you want to fly, fix, manage, or build—along with tips on how to win them.

**Go after your dream.** Apply to every scholarship you qualify for. Write that essay. Get that recommendation letter. Take that first step. The sky isn't the limit—it's just the beginning.

*Blue skies and tailwinds,*

## HOW TO WIN AVIATION SCHOLARSHIPS: EXPERT TIPS

*Disclaimer: Always verify deadlines and eligibility at the official scholarship website.*

## 1. Start Early & Stay Organized

Create a spreadsheet tracking every scholarship name, deadline, requirements, and status. Many applications open in the fall (October) with deadlines in winter/spring. Set calendar reminders 2-4 weeks before each deadline.

## 2. Join Key Organizations NOW

Many top scholarships require active membership in organizations like AOPA, EAA, WAI, OBAP, LPA, or NGPA. Some require membership for 3+ months before applying. Join early! Many offer free or discounted student memberships.

## 3. Pass the FAA Written Exam Early

Several major scholarships (AOPA, EAA Ray, and others) require you to have passed the FAA Private Pilot Knowledge Test before applying. Use free resources like the AOPA Foundation Flight Training Scholarship Clinic and Sporty's to prepare.

## 4. Tell YOUR Story

Scholarship committees want to know what ignited your passion for aviation. Be specific: was it a discovery flight, an airshow, a family member who flew? Show them your "why" and what you will do differently in the industry.

## 5. Demonstrate Commitment

Even a few logged flight hours, a discovery flight receipt, ground school enrollment, or volunteer work at a local airport shows you are serious. Take a free intro flight lesson before you apply.

## 6. Get Strong Recommendation Letters

Ask your recommenders at least 3-4 weeks in advance. Choose people who know you well: flight instructors, aviation mentors, teachers, or employers. Give them your resume and essay so they can write a targeted letter.

## 7. Apply to EVERYTHING You Qualify For

Many scholarships receive surprisingly few applications. Your odds are better than you think! Do not self-eliminate. If you meet the minimum requirements, apply. Reuse and adapt your essays across multiple applications.

## 8. Keep Applying Every Year

Didn't win this year? Many scholarships allow you to reapply. Update your application with new accomplishments, hours, and ratings. Persistence pays off in aviation and in scholarship applications.

**PRO TIP:** Stack your scholarships! There is no rule that says you can only win one. Some students fund their entire training through multiple awards.
